Press Release

Xabler Releases New Titanium AV and Titanium Rack Servers

Stylish and functional servers for turnkey automation

June 09, 2003: Xabler, of Provo, Utah has announced its new Titanium server line and announced the release of two new servers. The Titanium Audio Video (AV) server is a great addition to any home theater or audio video installation. With its high-end components and sleek design, it fits nicely with any standard audio video equipment. The Titanium Rack server is a slim 1U rack mount server, only 16" deep, that fits easily in any standard computer or audio/video rack. It is small, yet powerful. The Titanium AV server and Titanium Rack servers are pre-installed with Xabler's 2.0 software. This enables them to control, lighting, audio video, security, etc. Xabler Digital Music Server (DMS) and the Xabler Video Server are options with either Titanium server. This gives power and complete control in one easy-to-install server. The Titanium line of servers can be installed in less than one hour through the power of Xabler's software.

###

About Xabler: Xabler was founded in January of 2001 to meet the growing need of IP-enabled and Internet controlled home automation systems. Xabler's company officers have over 20 years of combined experience in the computer networking and home controls industries. The company focuses on ways to deliver quick conversion, seamless integration, and powerful control options to home and business customers.
